

Twenty Process Discovery Questions (plus a bonus or two)

The list below includes many of the general-purpose questions that Harvard Computing Group consultants ask during the Discovery Phase of a Process Capture project. We are likely to ask most of these questions multiple times during a Process Capture workshop as well as during interviews.

1. Who is involved? (brainstorm about all roles involved in the process)
2. Is there any existing documentation for this process?
3. What is the first task?
4. How long does it take?
5. How often does this happen?
6. Who is responsible?
7. Who provides support?
8. What documentation or instructions are required?
9. What tools are used to complete this task?
10. What IT systems are used to complete this task?
11. What happens if the task is completed successfully?
12. What happens if the task fails?
13. Are there any other possible outcomes from this task?
14. Does this task need to be broken down into more detail on another page?
15. What happens next?
16. Can the next task begin immediately or is there preparation or waiting time beforehand?
17. If you could change one thing, what would it be?
18. Which part of the process causes the most problems or produces the lowest quality results?

Twenty Process Discovery Questions (plus a bonus or two)

19. When there is a decision in the process, what happens if the outcome of the decision is one of the following?
 - Yes/Approved
 - No/Rejected
 - Need more information
 - Other
20. Who else is involved?
21. Does it always work this way?
22. What is the end state, i.e., the last action in the process?
23. Does this process interconnect with any other processes?
24. Are all of these tasks appropriate at this level of detail or should some be included as a subprocess?
25. Are there KPIs or other metrics you collect for this process?
