

Flowchart symbols

	process	a step in a process; often thought of as an operation that changes an input into an output
	flowline	shows the sequence of flow through a process
	start/end (or terminal)	the beginning or end of a process or sub-process
	decision	a decision point with two or more outcomes
	subprocess (or predefined process)	identifies a set of process steps that are defined elsewhere
	document	a document that provides information for a step in a process
	database	a database or other data source
	off-page connector	leads to or from another page
