

Customer Interview Notes

Gather information about your customer and what they do

Ask questions like:

- What do they do at work?
- What does a typical day look like?
- What are their common tasks vs uncommon tasks?
- How is their performance measured?
- Are they responsible for any metrics?
- What other teams and departments do they work with?
- What are all the systems and tools they use to perform a common task?
- What are their frustrations or pain points?
- Ask if they had a magic wand to fix something, what would they fix?
